LIFECLEAN DISINFECTANT
USER INSTRUCTIONS
Premixed solution for cleaning and disinfection of surfaces with proven efficacy against bacteria, viruses, fungi and spores.

1. Remove visible dirt.
2. Apply on the intended surface, leave for at least 2 minutes.
3. If necessary, wipe or rinse the surface. Wiping/rinsing is recommended after contact time as some metal surfaces can react at low pH.
4. Regular rinsing of surfaces with water is recommended.
5. Follow local guidelines for personal protection.
6. Close opened bottle and mark with opening day.
7. Excess liquid is poured into the drain, emptied bottle is recycled.
Tools

1. Remove visible dirt.

2. Place the tool in a container with LifeClean. If the tool can not be soaked with LifeClean, apply LifeClean directly to the tool.

3. Leave for 2-5 minutes.

4. Clean, rinse and dry well.

For information regarding personal protection, stability, and material compatibility please see the current safety data sheet.
